Message from CHAIRPERSON

Construction Development Board plays a vital role in the development of the construction industry of Bhutan as well as to strengthen the key players of the construction industry. There were major interventions that from the CDB board such as increasing the financial threshold of Medium Class Contractors from Nu. 15 million to 20 million and increased the works in hand ceiling from 5 to 8 numbers for Large Class Contractors. These has benefited the contractors up to greater extend. Revise the evaluation parameter for procurement of work above 5 million.

During most of the past financial year, corona virus restriction were imposed globally and Bhutan was not an exception. These restriction impacted the construction industry to a greater extend. Yet CDB worked in close collaboration with the relevant agencies has undertaken numerous activities such as training in Employability skills for Construction Degree Engineers. 252 Engineers were trained in construction industry Rules and Regulations, e-GP, OHS & CMS. The engineers are eligible for skilled manpower requirements as per the revised evaluation parameters for Procurement of works above 5 million.

The Construction Development Board is consistently enhancing its research and development capacities and encouraging more communication and advocacy with regard to quality of construction, occupational health and safety and use of different construction technologies to encourage participation of our youth in the construction sector.

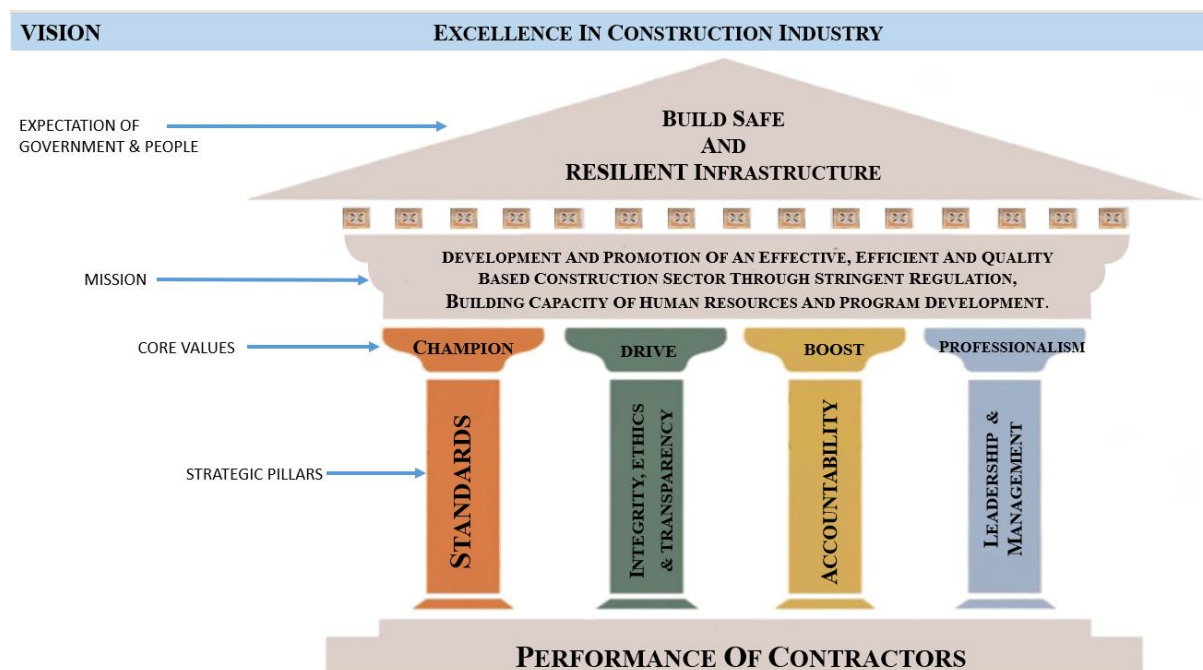

I humbly submit my zeal in presenting the Annual Report 2021-2022 of the Construction Development Board. As Chairman, it is indeed a privilege to contribute the resources at my disposal in the development of the construction industry.

Tashi Delek!

His Excellency Lyonpo Dorji Tshering
Chairperson, CDB

Strategic Pillars for the Development of the Construction Industry

"We have to live by the infrastructure that we build and it is our responsibility to build Safe and Sustainable Infrastructure for future generations"

Construction Industry plays an indispensable role in the Bhutanese economy from delivering economic infrastructure such as roads and bridges to enhance the connectivity and delivery of people and goods, thus increasing profitability of people and their trade. Similarly, social infrastructure improve access to the needs for the wellbeing of people, the community and contribute significantly to the accessibility of the Bhutanese people. Despite its imperative role, the industry suffers from a lack of coordinated approach to solutions between agencies and is slowly becoming the victim of compartmentalized working nature of construction stakeholder agencies and implementation issues arising from limited enforcement of rules, lack of standard operating procedures, collusion and overridden sense of ethics, faults within the tendering process and lack of a central agency to withhold the values and integrity required by the construction sector.

On a positive note, new technologies, machines and equipment are gradually enhancing the efficiency of the sector, more people understand the requirement for improvements, more systems are being developed to improve regulation, more research and development activities are targeted with more coordination and collaboration between agencies being encouraged to address issues. Safety and quality are being made more prominent and activities to improve their scenario are being formulated, implemented and regulated by the agencies. Perception of the limitations in the construction sector is more pronounced than ever before.

Complementing this perception, it is imperative for every Bhutanese person, whether involved in the construction sector or not, to understand the necessity of the right to sustainable, resilient homes and public infrastructure.

The impact of climate change increases the risks imposed by substandard infrastructure to the people and the development of Bhutan. The location of Bhutan within the junction of the collision zone of the Himalayas in the Indo- Eurasian plate further stipulates greater unpredictability to disasters.

The Construction Development Board strives to achieve its vision of “**Excellence in the Construction Industry**” with regard to the expectations of the government and people for safe, resilient, high quality sustainable infrastructures by developing and promoting a quality-based construction sector through strategic regulation and competent manpower, with capacity to enhance development of standards, inculcating a sense of ownership for integrity and ethics, enhance transparency and accountability and develop perception for effective leadership and management in construction sector stakeholders. CDB, however, acknowledge that the weight of achieving the strategic pillars is dependent entirely on the performance of contractors. As the agency with primary mandates to develop the professionalism, efficiency, integrity, technological and managerial capacity of construction firms and its reach extending into quality compliance in contract, materials and equipment, CDB’s current capacity ought to develop with additional manpower empowered by appropriate skills, equipment and tools and legal stance for efficient regulation.

Based on the above strategic pillars for development of the construction industry, the Construction Development Board inculcates the requirement to fulfill the following organizational strategic thrusts in order to achieve the aforementioned strategic pillars.

A well manned premier institution empowered by strong legal framework to effectively regulate the construction industry thereby promoting highest standards of transparency, accountability, leadership, ethics and integrity.

Endeavor towards construction of safe, green and sustainable quality infrastructure through stringent monitoring, capacity development and promotion of best practice technologies in the region;

Institute an effective performance management system of contractors to select the best construction firms to build high quality infrastructure.

Standard

Considering the importance of building Safe and High Quality, Resilient infrastructure, it is imperative to have uniformity and standards in all spheres and process of works.

Guidelines, Specifications, Codes and Rules must channel the work flow while planning. Design and drawings should have regulated benchmarks for appropriate and comprehensible implementation.

Leadership and Management

Leadership in the construction industry is crucial at this juncture of Bhutan's rapid development period, a lack of which leads to passive and gradual approaches to addressing issues and challenges such as time and cost overrun of projects, delivery of substandard and defective quality infrastructure, and the risks of lagging in innovation and adoption of new technology. Therefore, developing/promoting technical and managerial skills in the construction sector especially of the private firms is crucial to embark professionalism.

Accountability, Ethics, Integrity & Transparency

The key success to building Safe and High Quality, Sustainable Infrastructure depends on Ethics/Integrity and Accountability of the construction professionals and contractors. It is essential for interventions to nurture fortitude of contractors and construction professionals to execute projects with accountability and integrity, driven primarily by an intrinsic urge to uphold the commitment to deliver highest quality infrastructure and sense of ownership. The construction Industry must own up to disseminate information to augment transparency and responsibility to the utilization of public/private funds.

CDB Core Values

Champions

Leadership, construction management, standards, ethics, integrity, accountability and transparency in construction industry.

Drive

towards stringent regulations and enforcement in construction industry to enhance professionalism.

Boost

safe, sustainable and quality infrastructure.

Roles and Responsibilities of CDB

- » Act as **promoter** as well as **regulator** of the Construction Industry
- » Act as **bridging organization** to take the roles of coordinator, facilitator and enabler to develop construction industry by mobilizing the efforts and resources of both public and private sector
- » Assist the **private sector** in undertaking more expansive part in the industry through business, technology and manpower development
- » Assist the **government** in obtaining increased returns on its investment through the promotion of an efficient and quality-based construction industry.
- » Ensure **fair and equal access** to the award of contracts as well as treatment in the execution of contracts
- » Provide **essential services** to construction industry and to act as a catalyst to fulfill the needs of the industry.

Functions of CDB

Overseer of the Industry

Plan the direction of the construction industry in collaboration with relevant agencies, address pertinent issues and challenges, procurement grievances, policy reviews and formulation of rules and regulations pertaining to the construction industry.

Registration & Coordination

Registration of construction firms, construction personnel, conducting workshops for resolutions, enable environment for promotion of local firms, promote public-private partnerships and monitoring and regulation of compliance

Technology Development

Promote Research and Development of effective construction quality and improve construction technologies / techniques and materials, recommend improvements to the practices of procurement and contract administration

Manpower Development

Promote and facilitate certification of construction related manpower, enhance local workers, conduct skills awareness programs, develop technical and managerial skill of private firms and training workshops for aspiring firm

Data and Information

Collect and disseminate construction industry information and statistics, create database, promote information technology, and online access through a one window services for enhanced planning, monitoring and decision making.

Director DRE MoEA

Mr. Tshering Yonten
Executive Director CAB

Mr. Thinlay Gyamtsho
President CAB

CDB Board initiatives

Details of board meetings held

Sl #	Board Meeting details	Date	Board members attended	Board members absent
1	75 th BM	19 th August 2021	6	3
2	76 th BM	30 th December 2021	6	3

Note: Mr. Lham Dorji, Director, DoL, MoLHR joined as a new CDB Board member from August 2021.

Some of the important initiatives undertaken from Board Meetings

75th Board Meeting:

- » Adopted Top 10 Contractor Selection Criteria.
- » Adopted revision of Monitoring Guidelines 2020.

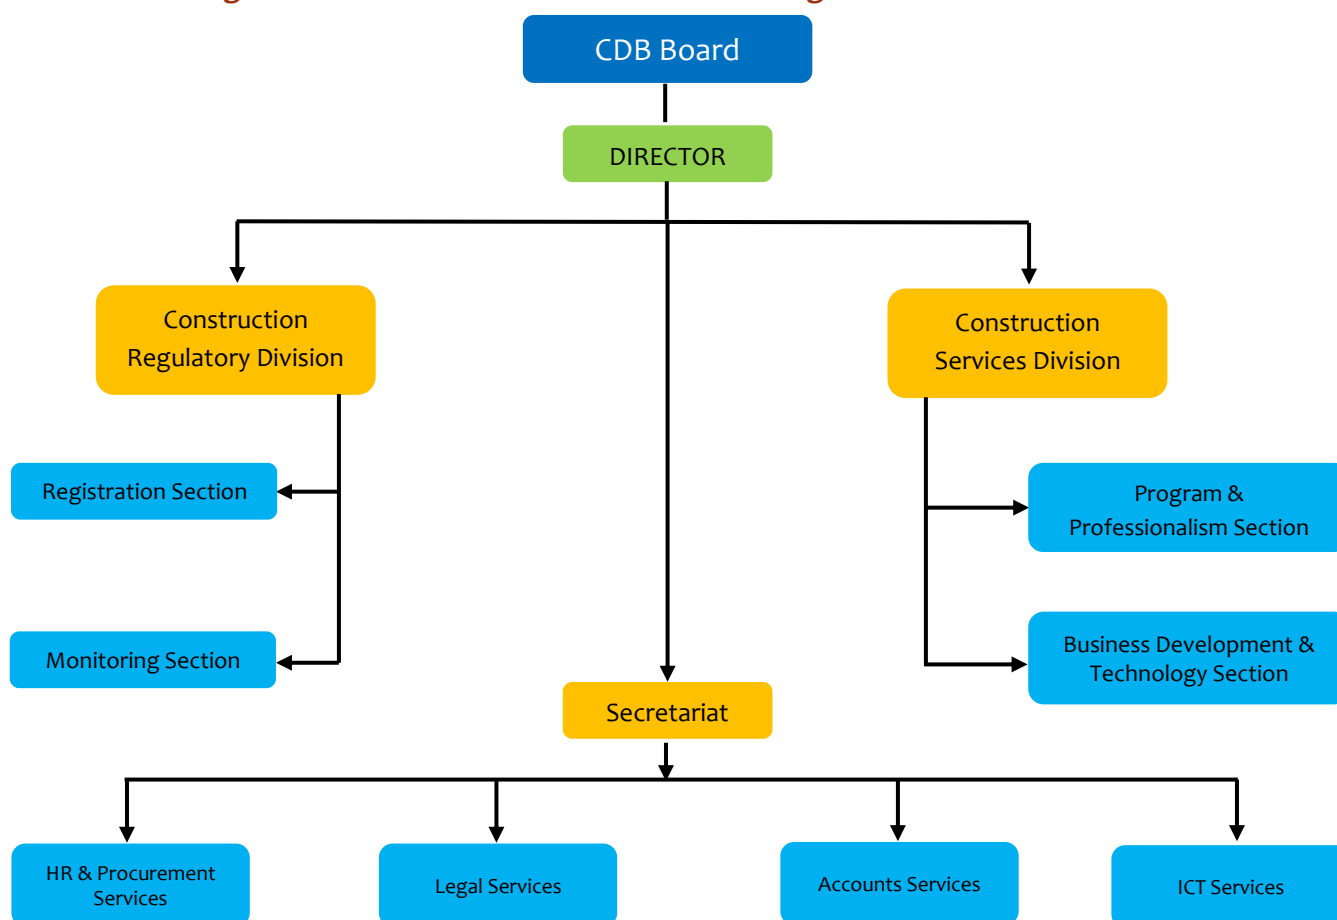

76th Board Meeting:

- » Reconstitution of BMCC, Ethics Committee & CGR Committee.
- » Adoption of FDI Guidelines for Construction Services.
- » Points to be given for fresh engineer during evaluation under 'adequate skilled manpower'.

Services of CDB

Registration (online)

- » Registration of contractors
- » Registration of consultants
- » Registration of Specialized firms (from July 2020)
- » Registration of architects
- » Registration of specialized trade (from June 2019)
- » Registration of engineers (from June 2019)
- » Registration of surveyor (from June 2019)

ICT Services (e-Zotin)

- » **Online registration** - Online registration services provided by the Secretariat for Contractors, Consultants, Architects and Specialized Trades.
- » **e-Tool (Online Evaluation Tool)** - Online evaluation tool for procurement of works carried out by government procuring agencies.
- » **CiNET (Construction Industry online information)** - Interface for corporate, NGOs and donor funded projects to update work information.
- » **CRPS (Contractor Registration & Performance System)** - for managing contractors, consultants, architects and specialized trade.

Legal Services

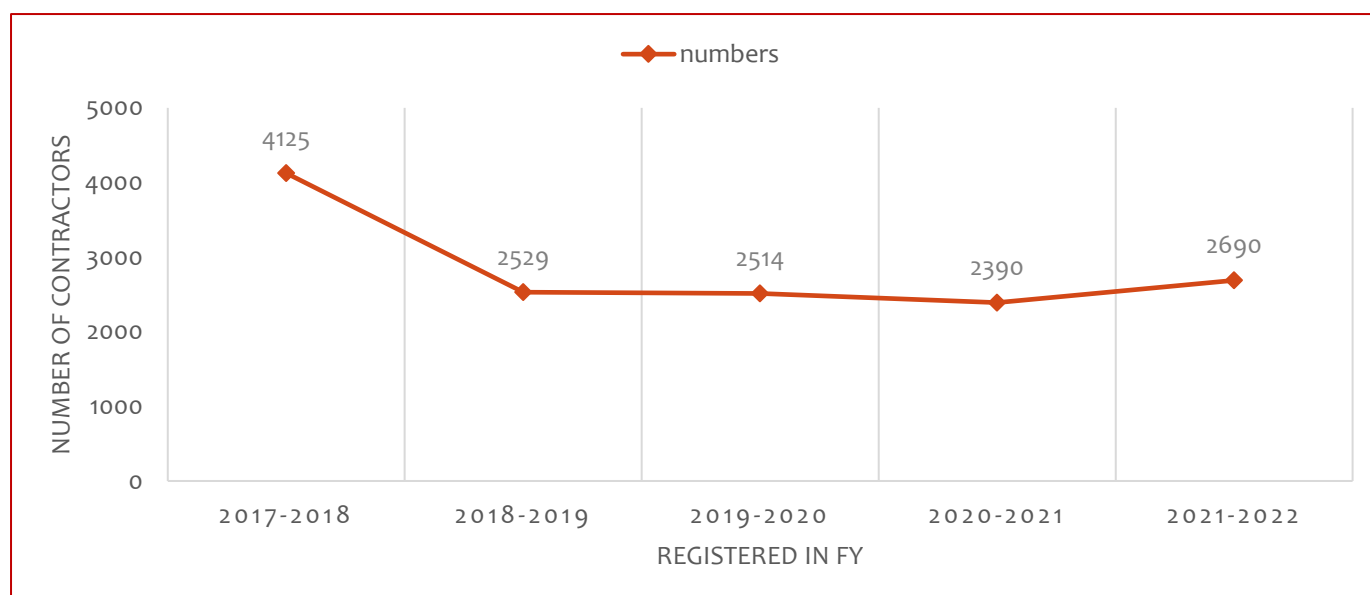

- » Grievance Redressal (facilitation of grievances in payment, human resource and equipment, registration, transfer etc.)

Capacity Development and Promotion Services

- » Trainings (Induction & Refresher course, BIM, OHS)
- » Awareness programs (OHS)

PROMOTION AND PROFESSIONALISM

The Program and Professionalism Section in pursuit of promoting a robust and vibrant construction industry has to conduct mandatory Refresher Course and Induction Course for new aspiring contractors. Besides, enhancing the professional capacity of contractors, the training also notably facilitates in boosting development and promotion of an efficient, effective, quality-based construction industry, contributing to healthy and competitive growth. The Induction Course for aspiring contractors is a one-day program. The mandatory Refresher Course is a three days program for large and medium class contractors and two days program for small class contractors.

The integrated training program is uniquely designed to impart basic knowledge and skills in various construction fields and management aspects like Risk Management, Quantity Surveying and Quality Assurance, management and control, Occupational Health and Safety, project scheduling and are also familiarized to CDB registration and regulatory procedures, procurement rules and regulations and aspects of contract administration including arbitration. Various stakeholders including the Anti-Corruption Commission, Government Procurement and Property Management Division, Department of National Properties, Ministry of Finance are involved in imparting the modules.

Details of the Induction and Refresher course for Contractors conducted.

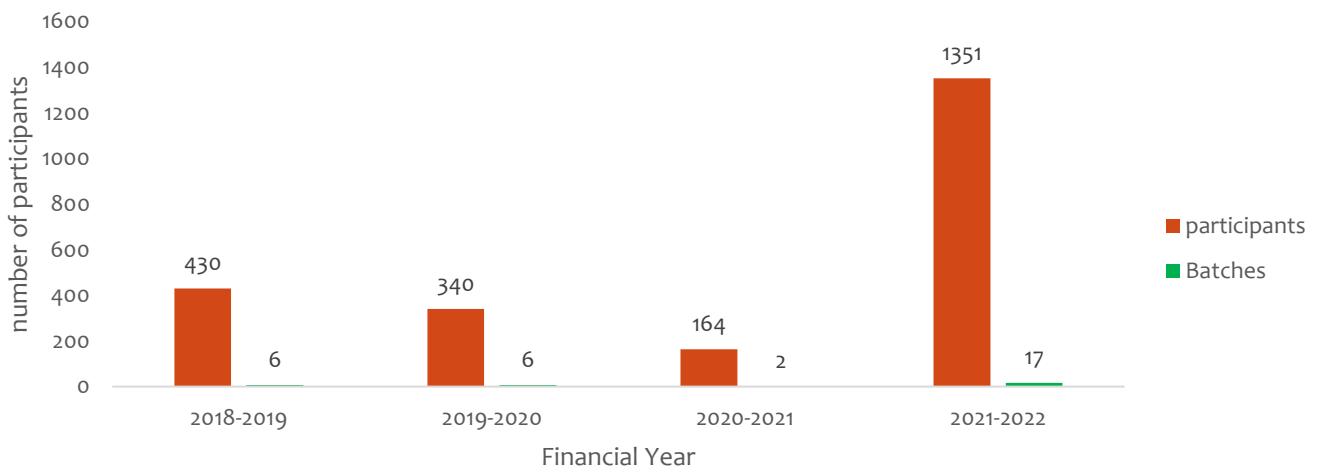

A. Induction course details

Batch	Period	Target Participants	Nos. of participants	Venue
1	23 rd Aug. – 8 th Sep. 2021	New contractors	1016	Virtual
2	27 th Dec – 30 th Dec. 2021	New contractors	335	Virtual
		Total	1351	

B. Mandatory Refresher's course details

Batch	Period	Target Participants	Nos. of Participants	Venue
1	12 th July – 15 th July 2021	Large & Medium Class	23	Virtual
2	19 th July – 20 th July 2021	Small Class	64	Virtual
3	20 th Sept. – 22 nd Sept. 2021	Large & Medium Class	45	Virtual
4	20 th Oct. – 22 nd Oct. 2021	Large & Medium Class	48	Virtual

Training trends for Refresher course

MONITORING

As an overseer of the construction industry, a key area for the development of construction is through CDB's mandate to regulate the construction industry through compliance monitoring. Compliance monitor ensures that construction firms are professional and conduct their commitments to projects and clients' requirements as well as fulfill minimum requirements according to class and category. Construction firms are strategically and regularly monitored for compliance to registration commitments.

Depending on the category and class of the contractors, the requirement are cross checked and verified. In case of defaulters, relevant actions including downgrading, suspension and other regulatory measures are taken according to the Monitoring Guidelines and the decision of Monitoring Committee.

Monitoring of Office establishment of Contractors

Office Establishment Monitoring comprises of monitoring of contractor's office set-up, human resources and registration requirements. All large and medium class contractors are obligated to maintain office setup in their registered Dzongkhags and employ human resources as committed during registration/renewal. Administrative actions including downgrading to lower class/category and suspension are taken upon noncompliance.

Description	Large class	Medium class
Number of contractors monitored	139	233
Total	372	

Administrative action taken

Description	Downgraded to lower class	Issued reprimand/suspension
Number of contractors.	45	19
Total	64	

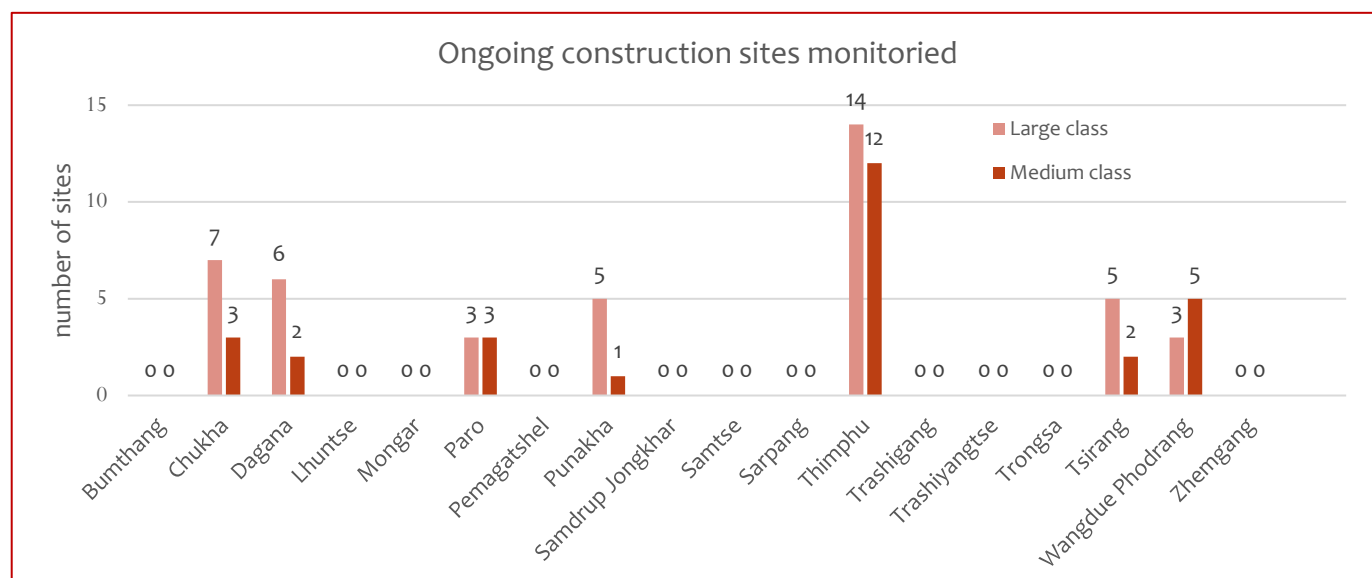

Ongoing Site Monitoring

The monitoring team of CDB randomly monitor/inspect ongoing construction sites on the compliance to fulfillment of the Human Resource (HR) and equipment requirements as committed in the contracts of projects. The compliance monitoring of project committed resource includes verification and monitoring of contractor obligations to deploy the committed resources to the work site as per the contract.

Contractors also have responsibility to have good construction management practices at site. The monitoring team checks the compliance of both contractor and the procuring agencies to the contract documents.

With the current of human resource, the monitoring team has monitored 78 ongoing sites out of works awarded through e-Tool. The 78 sites in different parts of the country are indicated in the graph below.

Construction Sites Monitored (Dzongkhag wise) and classifications 2021-2022

Major Observations from site monitoring

Total of 47 construction project sites of large class construction firms were monitored. The observations from 47 construction projects monitored of large class construction firms reveal that:

1. 82.98% of 47 sites monitored have a proper project office establishment
2. 44.68% of 47 sites did not have project informatory sign boards.
3. 35 project sites out of 47 project sites have maintained work plans.
4. 31 out of 47 sites kept hindrance register records.
5. Out of 129 committed Human Resources for the 47 project sites, only 53 were deployed and 31 were replacements of committed personals.

Similarly, the observations from 31 construction project sites of medium construction firms indicated;

1. Only 38.71% of 31 project sites have an office establishment.
2. 80.65% of the 31 sites did not have project informatory sign boards.
3. 15 of the 31 project sites have maintained work plan.
4. 14 out of 31 sites kept hindrance register records.
5. Out of 76 committed Human Resources for the 31 project sites, only 54 were deployed and 8 were replacements of committed personals.

RESEARCH & TECHNOLOGY DEVELOPMENT

Observations for works awarded in e-tool

No. of works awarded and total amount in the three classes of contractors.

Class	Large	Medium	Small	Registered (W2)	Total
No of works	81	156	641	1	879
Total Amount (Nu. million)	6250.978	1592.261	1119.444	1.489	8964.174

No. of works awarded and total project cost (Dzongkhag wise)

Dzongkhags	No. of works	Amount (Nu. in million)
Bumthang	19	202.092
Chukha	73	524.208
Dagana	68	293.806
Gasa	24	105.319
Haa	21	61.184
Lhuentse	32	88.929
Mongar	39	866.792
Paro	40	638.982
Pemagatshel	42	249.937
Punakha	45	258.330
Samdrup Jongkhar	71	640.032
Samtse	48	463.731
Sarpang	42	484.319
Thimphu	92	2936.699
Trashigang	40	130.882
Trashiyangtse	26	96.531
Trongsa	28	130.489
Tsirang	38	122.186
Wangdue Phodrang	54	412.164
Zhemgang	37	257.553
Total	879	8964.174

In total, 879 works were awarded in 2021-2022 amounting a total cost of the projects to Nu. 8964.174 million.

Bidder Participation

Following were the findings compiled from the Evaluation Report of works executed by Large and Medium Contractor's evaluated and awarded through e-Tool:

Bidder participation in tenders for works on e-tool

Class	No. of works awarded in e-Tool	No. of bidders participated	Average no. of bidders for each work	Max. bidders participated	Min. Bidders participated
Large	81	392	5	13	1
Medium	156	623	4	16	1
Small	641	8627	13	73	1
Registered (W2)	1	-	-	-	-

Qualification of bidders during the technical evaluation stage

The evaluation system for bidders' selection is a two-stage evaluation process. In the 1st stage (Technical evaluation), a firm need to obtain at least **70 points** out of 100 in order to qualify for the 2nd stage (Financial & preference score evaluation). Only qualified bidders are taken to 2nd stage of evaluation.

Respective procuring agencies designs the HR & equipment requirement to suit their projects which is reflected in the bidding data sheet of the tender document.

The table below shows that on average 40% of bidders gets disqualified during the 1st stage of evaluation.

Qualification of bidders in tenders for works on e-tool

Class	No of works awarded in e-tool	No of bidders participated	No of bidders qualified for 2 nd stage
Large	81	392	245 (62.5%)
Medium	156	623	362 (58%)

Point based system is applicable for works executed by large and medium construction firms. The advantage of the Point Based System is that the bidders are in position to determine whether they would qualify the 1st stage of evaluation since the required HR & Equipment along with point allocation is clearly mentioned in the bid document.

Number of bidders disqualified in the 1st stage indicates:

- » Lack of professional knowledge to analyze the bid document before bidding;
- » Not updating work status on time with CDB; or
- » Non-availability of required resource and technical capacity with the bidders.

Compared to FY 2019-2020 the number of bidders disqualified for 2nd stage has increased from 28% to 40% for large class.

Works awarded below and above government estimate

The table below illustrates that for 1065 works awarded in the FY 2020-2021, the number of bidders participated for the works were 8206. Out of 1065 works, 791 works were awarded below the government estimate and 274 works were awarded above the government estimate.

Class	No of works	No of bidders participated	No. of works awarded below govt. estimate	No. of works awarded above govt. estimate	Max quoted price above govt estimate %	Min. quoted price below govt estimate %
Large	81	392	53	28	34.58*	-23.02*
Medium	156	623	105	51	28.28*	-49.01*
Small	641	8627	484	157	59.17*	-60.61*
Registered (W2)	1					

* The values are obtained from the evaluation reports

Discrepancy in Average Performance Score Rating (APS) of contractors

Average Performance Score (APS) is one of the main parameters to evaluate the contractors. APS is rated by the Procuring Agencies after the contractors has completed the work. APS is further divided into 2 sub categories;

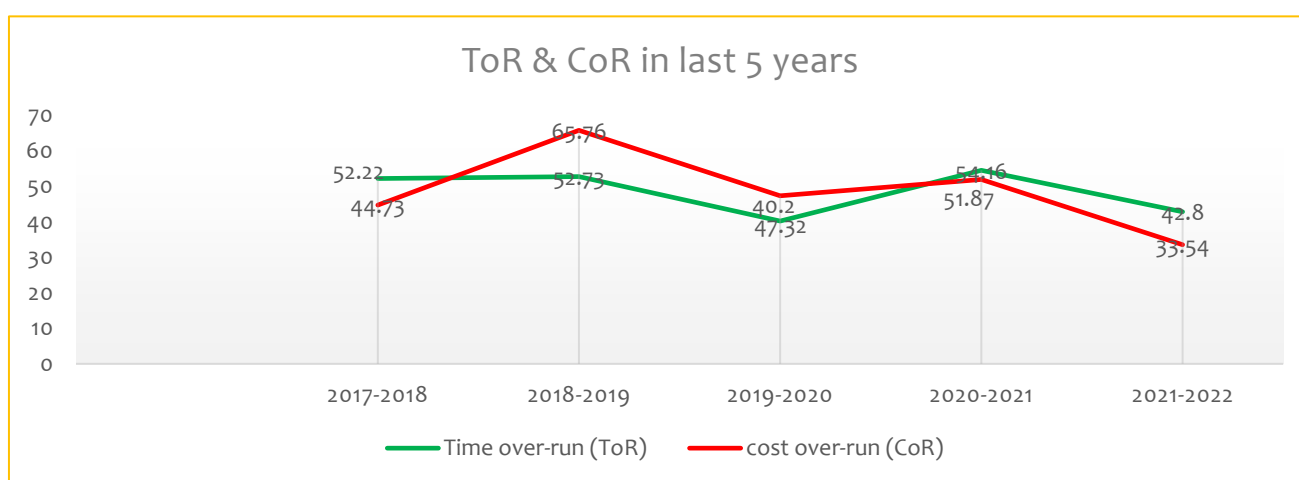

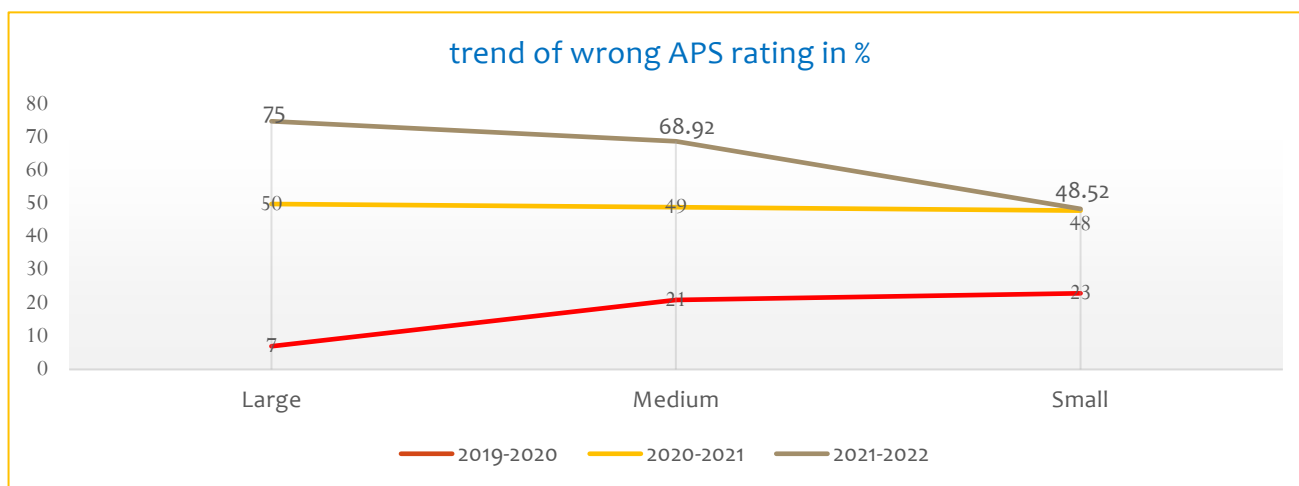

1. On-time Completion (30%); and
2. Quality of execution (70%).

Discrepancies in APS:

Despite the repeated reminders and advocating the procuring agencies, during the study of data for Annual Report, it was observed that some of the procuring agencies rates the contractors full score despite of the project running into time over run. For the FY 2021-2022, there were **558 works** rated full score that is 30 out of 30, however, on further analysis it was observed that out of **558 works** there were **320 works** running into time over run. This accounts to **40.47%** of the works rated wrongly. This non-compliance by the procuring agencies will affect the bidder's technical capacity and their performance scores resulting into unfair bidding process.

Class	Works rated full score (30/30)	Works with time overrun but rated full score	% of works rated wrongly
Large	72	54	75.00
Medium	148	102	68.92
Small	338	164	48.52
Total	558	320	40.47

Disclaimer: The finding is from the analysis of data updated/provided by e-tool focal person of various agencies in the e-TOOL/CiNET)

Projects running into Time and Cost Over-run

Time Overrun is a situation where the construction project does not meet the expected deadline. Every project during the planning phase will have the estimated cost of the project, HR and equipment utilization plan, designs and specifications. It was observed that out of **799** works completed in the FY 2021-2022, there were **457** works running into time over run, which is **42.80%**.

Cost Overrun is a condition in which there is sudden variation in the project cost which leads to the increase in the total project cost. It was observed that there were **531** works running into cost overrun, which is **33.54%**. The overall cost overrun for the 20 Dzongkhags is **41%** amounting to **Nu. 753.79 million** and other agencies is **23%** amounting to **Nu. 428.182 million**.

Dzongkhag Administration having projects running into Cost overrun				
Dzongkhag Administration	Awarded amount (Nu.)	Final amount (Nu.)	Cost Overrun (Nu.)	Cost Overrun (%)
Bumthang	51,715,958.23	66,885,938.83	15,169,980.60	29%
Chukha	137,665,379.12	163,117,494.21	25,452,115.09	18%
Dagana	111,151,695.98	129,531,513.53	18,379,817.55	17%
Gasa	5,291,876.47	6,200,976.20	909,099.73	17%
Haa	42,803,653.11	55,820,428.29	13,016,775.18	30%
